- › Process and Quality management

Traineeship: 2 internships of 6-8 weeks at Sanquin Blood Supply (the Netherlands)

## General information

**Are you interested in transfusion medicine? Motivated to become a leader of a blood supply organization in medium and low income countries? And committed to developing safe, efficacious and sustainable blood supply systems? Then this postgraduate Management of Transfusion Medicine (MTM) programme may suit you!**

The Management of Transfusion Medicine (MTM) programme is a result of the WHO initiative to improve blood supply organizations around the world. It is a unique programme for current and potential leaders of blood banks in medium and low income countries. The programme is focused on the individual development of our students: You will have the opportunity to choose your own research subject and are offered a tailor-made traineeship, which consists of two internships of 6-8 weeks at Sanquin Blood Supply in the Netherlands.

The first year of the programme is based on the concept of distance learning, which means that you will follow courses online, in your own pace, and in your own home country. The second year will revolve around your traineeship, alternated with a period of assignments and data collection in your home country. Your supervisors and professors are experts from the University of Groningen and Sanquin Blood Supply.
